SKILLS

- **Languages:** C++, Python, HTML, CSS, JavaScript, React.js, MongoDB, Kotlin
- **Others:** Operating System, OOP's, DBMS, Git, Figma, Linux

EDUCATION

Bachelor of Engineering in Computer Science – Chandigarh University   **Graduated June 2024**

- **Coursework:** Web Development, Data Structures & Algorithm, Scripting & Programming

PROJECTS

FundFlow Tracker   Nov'23 – Jan'24

- Orchestrated the development of a robust financial management platform utilizing MongoDB and Node.js technologies, enabling efficient tracking and management of finances.
- Designed and implemented seamless functionality for users to input income and expense statements, incorporating intuitive interfaces for effortless data entry and retrieval.
- Leveraged MongoDB's capabilities to maintain a comprehensive record of financial transactions, facilitating precise calculation of net summaries and balances, empowering users to gain valuable insights into their financial health.

News Sphere   Mar – Jun'2023

- Spearheaded the creation of a sophisticated news platform using HTML, CSS, and JavaScript, seamlessly integrating APIs for real-time updates and advanced features.
- Engineered user-friendly navigation systems for effortless article exploration, implementing responsive design techniques and interactive components. Cultivated a sleek interface for delivering precise and current news content.
- Demonstrated proficiency in web development, UI/UX design, and API integration, exemplifying a track record of delivering impactful solutions aligned with user needs and industry standards.

My Work Vault   Jul – Sep'2022

- Led the creation of a visually engaging personal portfolio, seamlessly blending striking design elements and interactive features for enhanced user experience.
- Strategically developed a sophisticated showcase platform to highlight significant accomplishments and skills, crafting a compelling narrative of professional prowess.
- Showcased technical expertise and aesthetic finesse in crafting a portfolio that maximizes user engagement, serving as a powerful tool to demonstrate expertise in a visually compelling and professional format.

WORK EXPERIENCE

Image Differentiator (Freelance)   Jan'24 – Feb'24

- Developed "Image Differentiator" project using Python that generates a RGBA image with the differences highlighted between the two images. One Image taken from user's local system and the other from a provided URL.
- Provides a seamless solution for users to visually compare images from different sources for discrepancies or changes.

Humor Hub (Freelance)   Mar'24 – Jan'23

- Spearheaded the creation of a dynamic web extension aimed at injecting humor into users' browsing experiences. Leveraging my expertise in JavaScript and API integration, I conceptualized, designed, and implemented a cutting-edge solution that seamlessly integrates with popular web browsers.

ACHIEVEMENTS

- Achieved **Web-Development Certificate** for getting 97% score and being in the Top Performers in the Internshala-Trainings.
- Secured **Global Rank 219** in CodeChef Starters 74 Division 4 Contest.
- Solved **150+ problems** on Geeks-for-Geeks and **200+ problems** on LeetCode.
